

# PP Precut Lidding

At **Kotronis Packaging** innovative ideas are embraced by our **Sustainability Strategy**.

Based on our strategy we offer an alternative to aluminum foil which ensures optimized recyclability, increased shelf appeal, production efficiency, safety & convenience for your packaging.

## PP precut lidding OFFERS

- 1 Uniqueness to your product** through branding and artwork design. It ensures matching colors with your IML packaging and a range of look & feel options for shelf exposure.
- 2 Convenience to consumers.** It peels easily from the packaging, without tearing and residuals. Its puncture resistance makes for safe food transportation.
- 3 Flexibility at low cost.** Thanks to the offset printing technique, the cost of printing and producing multiple PP precut lidding is relatively lower and allows flexibility in the seal's dimensions
- 4 Production efficiency,** with a wider process window and lower sealing temperatures.

The PP precut lidding and PP tub make your packaging monomaterial, ensuring that the complete package is easily sorted and recycled, as consumers no longer need to separate the tub and seal before throwing it in the recycling bin.
